REASONS FOR ALLOWANCE

1. Claims 1-7 are allowed.

2. The following is The Examiner's statement of reasons for allowance:

Claims 1-7 are allowable over the prior art of record because none of the prior art of record teaches or fairly suggests within the firmware of an imaging device, embedded collections of plural drivers, and plural, respectively paired, driver-specific-associated configuration information. These paired collections are specifically designed for operational compatibility, as appropriate, with different, particular client devices that are characterized with different operating systems. The paired components involve (a) *automatic client-device requesting* of a download of the appropriate one of such "pairs", (b) *automatic downloading* of the appropriate "pairs" (*driver and configuration information*), and (c) thereafter, *automatic configuring* of the downloaded driver in relation to the downloaded pair.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

a. Lomas et al. (US 2002/0097421) discloses the installation of a network printer onto a client processor and employs a server for managing printer installations. Initially, the server receives a printer identifier message from the network printer and then creates an executable installation program using

Art Unit: 2625

identifier information from the printer identifier message. Thereafter, the server transmits an e-mail message to the client processor, which e-mail message includes an executable printer driver installation program. Upon receipt of the email message, the client processor recognizes the executable installation program and, upon installation thereof, to utilize the network printer.

b. Nguyen et al. (US 7,430,736) discloses architecture for providing device software from a network peripheral device to a client machine. An end-user of a client machine connected to the network accesses the network peripheral device having the device software stored therein. In response thereto, the network peripheral device notifies the end-user that device software is available for download. The end-user then manually selects and downloads one or more components of the device software from the network peripheral device for subsequent installation on the client machine.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Neil R. McLean whose telephone number is (571)270-
